

FREE WEBSITE QUOTE

Thank you for taking interest in doing business with us. We would like to answer all your questions regarding our services. We offer great website design solutions to create a premium and unique website for your company.

Below you will find some information regarding how we price our website design and development. We also give you the opportunity to choose what features you want on your website. So read on!

CHOOSING A WEBSITE BASED ON YOUR BUDGET

Praise Web Design looks at website packages in a totally different way.

We think outside-of-the-box. We create websites that are edgy and unique. We don't label our website packages as just basic, deluxe or premium because every website is "one of a kind".

The only reason why you would choose a basic website package for example is due to a budget. But no matter what your budget is, we will create a premium looking website for you.

The way we can work with your budget is by adding the **Optional Features** as time goes on. But to the world your website will look premium right off the start.

Features already included in our website design and development:

- ✓ **Designer Website.** Fully loaded website with all the website functionalities with 6 banner ads designed for your brand.
- ✓ **Logo Design.** We will create a logo for your company according to your specifications or if you already have a logo, then we will alter it to work best with the layout and the overall look of your website.
- ✓ **Unlimited Pages.** Unlike other web development companies out there, we give you as many pages as you want of content for your website. As long as you provide the content, we will keep *refilling your coffee cup*. This is where Praise Web Design stands apart from the rest. (Pages are content such as articles with photos and embedded videos, contact us, about us, etc.). *Note:* Once the website is done and completed you will have up to 10 days to add any additional pages at NO charge.

- ✓ **Browser Compatibility.** We will ensure that your website will be accessible and can be viewed in multiple internet browsers such as Firefox, Internet Explorer, Google Chrome, Opera and Safari.
- ✓ **Mobile Phone Compatibility.** Your website can be viewed on electronic mobile devices optimized for Smart Phones & iPhones.
- ✓ **Contact Form.** A professional contact form that gives your client the possibility to request a phone call or leave an email to correspond to you. When the form is submitted an email is sent to you and a copy to your client.
- ✓ **Article Sharing Component.** Share articles and/or content on your website by clicking the PDF, Print and Email a Friend button on your article page.
- ✓ **Article Publishing.** Articles can also be also be published or removed by assigning a publish date or automatic publish if you want it to go live right away.
- ✓ **Article Rating.** Simple 5 star article rating if you want your readers to rate your articles.
- ✓ **Photo Flash Rotator.** A website module for displaying images on your website. Images rotate and display in various ways. This is a great way to showcase your product or your company on the front page of your website.
- ✓ **Polls.** This allows your clients or visitors to vote on a particular subject regarding your company or product. This module allows you to review the submitted polls by your users.
- ✓ **Pro Article Editor.** Easily edit or compose articles in a very simple, convenient and easy to understand article editor. Very similar to Microsoft Word functions.
- ✓ **Who's Online.** The "Who's Online" module displays information about users that are visiting your site at a particular moment.

✓ **Search Engine Friendly (SEF) URLs:** There are a few popular ways to pass information to your pages without the use of a query string, so that search engines will still index those individual pages.

A good URL looks like this:

NotAfee.com/domains-for-sale.html

A bad URL looks like this:

NotAfee.com/index.php?option=com_content&view=article&id=12&Itemid=59

✓ **Site Map.** A site map (or sitemap) is a list of pages on your web site that is accessible to crawlers or users. This helps visitors and search engine bots find pages on your site.

✓ **Advanced Search Function.** Our advanced search function is a flexible and powerful search component with an easy-to-use user interface that provides searching through all components from front-end and back-end with extra fields.

✓ **Free Video Training.** We can create custom videos tutorials to teach you on how to add/manage articles, pictures, videos, etc. on your website. This option is available to you if you decide not to pay for monthly website maintenance.
